Week 9: GenAI Governance Memo

- Due Monday by 11:59pm
- Points 30
- Submitting a text entry box or a file upload
- Available after Nov 9 at 8pm

Assignment

Write a governance memo for your final project's AI workflow with quantitative risk scoring and measurable thresholds.

Components

Submit as one PDF, using the numbered items below as your section headings in order.

1. **Workflow description** - what AI does, inputs, outputs
2. **Quantitative risk matrix** - likelihood (1-5) × impact (1-5) for each governance domain with justifications
3. **Governance rules with thresholds** - top 3 risk domains, each with measurable triggers referencing course metrics (confidence thresholds, F1 minimums, disparity ratios, cost caps).
   - Start by prompting an AI tool to draft rules for one risk domain, then rewrite them. AI-drafted policy language tends to default to principles ("review as needed") instead of measurable triggers. Log the before/after in your AI use log.
   - Back-test each threshold on your own project data using the Class 18 back-test notebook. Under each rule, add one line of evidence: what share of your data the rule would flag, how many of your actual errors it catches, and what you changed, if anything. Example: *"On my 143 project texts, this rule flags 17.5% and catches 6 of 14 errors. Added a 5% random audit of high-confidence outputs to cover the errors it misses."*
4. **Data rules** - what data enters AI, classification, restrictions
5. **Human review and disclosure** - who reviews, when, with at least one quantitative trigger
6. **Prohibited uses and escalation** - what's not allowed, what happens when a threshold is breached
7. **Connection to final project** - reference specific metrics from your Weeks 6-8 work

Also submit

- **Your back-test code** as .ipynb and rendered as .html. These cells also go in your final project notebook.
- **Your AI use log** covering the AI-drafted rules in Component 3 and any threshold you changed after back-testing. See the **AI use log guide** (https://canvas.du.edu/courses/213432/pages/ai-use-log) .

Rubric

Criterion	Excellent (5)	Adequate (3)	Needs revision (1)
Workflow clarity	Specific, operational	Present but vague	Missing
Risk matrix	All domains scored with likelihood × impact	Risk assigned without matrix	No assessment
Quantitative thresholds	3+ rules with specific, measurable triggers, each back-tested on project data, with AI's draft critiqued and rewritten in the use log	Some rules but thresholds vague, not back-tested, or AI draft not critiqued	Principles only
Data and review rules	Specific with quantitative triggers	Present but generic	No specifics
Escalation	Clear owner, breach > action > timeline	Some accountability	No structure
Course connection	References Weeks 6-8 metrics directly	Loosely connected	Disconnected

Total: 30 points

Week 9: GenAI Governance Memo

Criteria	Ratings				Pts
Workflow clarity Workflow clarity	**5 pts** **Excellent** Specific, operational		**3 pts** **Adequate** Present but vague	**0 pts** **Needs revision** Missing	5 pts
Risk matrix Risk matrix	**5 pts** **Excellent** All domains scored with likelihood × impact		**3 pts** **Adequate** Risk assigned without matrix	**0 pts** **Needs revision** No assessment	5 pts
Quantitative thresholds Quantitative thresholds	**5 pts** **Excellent** 3+ rules with specific, measurable triggers, with AI's draft critiqued and rewritten in the use log	**3 pts** **Adequate** Some rules but thresholds vague, or AI draft not critiqued	**1 pts** **Needs revision** Principles only	**0 pts** **No Evidence** Missing	5 pts
Data and review rules Data and review rules	**5 pts** **Excellent** Specific with quantitative triggers		**3 pts** **Adequate** Present but generic	**0 pts** **Needs revision** No specifics/Missing	5 pts
Escalation Escalation	**5 pts** **Excellent** Clear owner, breach > action > timeline		**3 pts** **Adequate** Some accountability	**0 pts** **Needs revision** No structure/missing	5 pts
Course connection Course connection	**5 pts** **Excellent** References Weeks 6-8 metrics directly	**3 pts** **Adequate** Loosely connected	**1 pts** **Needs revision** Disconnected	**0 pts** **No Evidence** Missing	5 pts
